

LIMOMAX[®]

Ultimate care through improving water care

LIMOMAX

LIMOMAX - LQ is a synergistic combination of anti-bacterial organic acids to control micro-organisms including *Salmonella*, *E. coli*. The product eliminates pathogenic bacteria in drinking water and liquid feed and helps to protect the animal for *Salmonella* and *E. coli*

PROPERTY & MODE OF ACTION

	Formic acid	Propionic acid	Citric acid	Lactic acid	Benzoic acid	Phosphoric acid
Property	Organic	Organic	Organic	Organic	Organic	Inorganic
Mol. Wt.	46.0	74.0	192.0	90.0	122.2	98.0
pK1		4.87	3.14	3.08	4.20	2.12
pK2			4.77			7.21
pK3			6.37			12.67
Mode of action	Inhibits bacterial growth	Inhibits bacterial growth & reduces contamination	Inhibits bacterial growth	Acidification of water	Inhibits bacteria and upper gut acidification	Acidification & helps in protein digestion

BENEFITS

- Prevents growth of *Salmonella* and *E.coli* in drinking water, liquid feed and the gastro-intestinal track
- Improves animal performance
- Reduces mortality
- Improves animal performance

COMPOSITION

Liquid blend of formic acid, propionic acid, lactic acid, citric acid, benzoic acid and orthophosphoric acid

INDICATION

For regular water sanitization, to improve gut health by controlling bacterial contamination in water

USAGE INSTRUCTION

Through drinking water: Breeder, layer, broiler: 0.20 ml per liter. To be used continuously in flocks

PRESENTATION:

500ml and 1-liter bottle
